CAREER SUMMARY

Java Backend Developer with hands-on experience developing RESTful business applications using Java, Spring Boot, Spring Security, Hibernate, and PostgreSQL. Skilled in API development, debugging, testing via Postman, and database management. Currently gaining industry experience through a software development internship while building secure, scalable backend solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java(17+), SQL, Python(Basics).
- **Framework and Technologies:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, Servlets, JSP.
- **Backend & Architecture:** RESTful APIs, Microservices, MVC Architecture, Authentication & Authorization (JWT).
- **Database:** PostgreSQL.
- **Tools & Platforms:** Git, GitHub, Maven, Postman, Eclipse, VS Code, Apache Tomcat.
- **Frontend & Web:** Angular, HTML5, CSS3, Bootstrap.
- **Core Concepts:** Object Oriented Programming(OOP), Multithreading, Exception Handling, Java Collections.

WORK EXPERIENCE

NagLeela - Remote (Chennai, Tamil Nadu)

Software Development Intern | June 2026- Present

- Implemented Python scripts within Blender to generate 3D models and apply automated cloth physics simulations.
- Configured a headless execution environment using Docker to run simulation scripts inside a container without requiring a graphical user interface (GUI).
- Researched and analyzed modern backend data tools, exploring Prisma ORM, vector databases, and embedding generation for upcoming project requirements.
- Created structured technical documentation detailing the cloth physics setup, container configuration, and workflow logic.

PROJECTS

Secure User & Order Management System | Java, Spring Boot, Spring Security, JWT,PostgreSQL, REST APIs & Postman.

- Engineered secure authentication and authorization using Spring Security and JWT validation, implementing BCrypt password encryption and Role-Based Access Control (ROLE_USER, ROLE_ADMIN) to safeguard protected API endpoints.
- Built role-based administrative API endpoints to manage registered user data, view order histories, and safely process account deletions by ID in PostgreSQL.
- Conducted API testing and debugging via Postman to verify standardized HTTP status codes, ensuring stable client-server data exchange prior to Git repository deployment.

EDUCATION

- Bachelor Of Science (BSc) in Computer Science - Savitribai Phule Pune University, Pune

Graduation - 2026

CGPA - 8.94/10
